Create test strategy

Version 1 · Draft · applies across plans and releases

Close ×

Strategy name * — Web quality strategy

Start from template — Blank

PURPOSE AND SCOPE

Purpose and objectives *

Scope *

Exclusions *

Risk-based approach * — How testing effort is prioritised

APPROACH

Test levels *

- [ ] Unit
- [ ] Integration
- [x] System
- [ ] Acceptance

Test types *

- [x] Functional
- [x] Regression
- [ ] API
- [ ] Security
- [ ] Accessibility
- [ ] Performance
- [ ] Usability
- [ ] AI evaluation

Test design techniques — Boundary values, equivalence partitioning...

Automation strategy * — What to automate, tools, maintenance

Manual testing approach — Exploratory, usability

Test data approach * — Creation, masking, privacy, cleanup

Test environment approach

GOVERNANCE

Defect management * — Severity, triage, retest

Entry / exit principles *

Quality metrics * — Coverage, pass rate, defect trends

Roles and responsibilities *

Risks, assumptions and dependencies *

AI assist Draft sections and flag risks from the project. You review everything before approval. Draft with AI

v2 · Joe · 12 Oct
v1 · Amira · 3 Oct
Compare

AI review · suggestion Add a rollback criterion to the release gate. Inputs used: strategy v3, plan R1.9.

Create test plan

For one release, sprint or cycle. References the governing strategy.

Close

Plan name * — Release 1.9 regression

Release / build — 1.9.3

Strategy — Web quality strategy

Strategy version — v3 (Approved)

Plan objectives *

SCOPE

Test scope * — Features, modules, requirements

Exclusions *

Linked requirements * — Search requirements

Risks addressed * — Search risks

Test selection

84 cases selected

Select suites | Pick cases | By filter or tag

Cases are referenced, never copied. Only approved versions are eligible.

Levels and types *

- [x] System
- [x] Regression
- [ ] API
- [ ] Accessibility
- [ ] Performance
- [ ] Security

CRITERIA AND SCHEDULE

Entry criteria * — Build deployed, smoke green

Exit criteria * — No open critical defects, 95% executed

Start — DD/MM/YYYY

End — DD/MM/YYYY

Milestones — Cycle 1, sign-off

RESOURCES AND ENVIRONMENT

Plan owner * — Me

Testers and reviewers * — Add people

Environments * — Staging

Test data requirements *

Dependencies and constraints *

Risks and mitigations *

Defect handling * — Triage, retest, unresolved defects

Automation / CI links — Workflow or pipeline

Quality metrics * — Pass rate, coverage, defects
